

## Case Study: Level 2 Package for Aluminum Plant

|                      |   |   |
|----------------------|---|---|
| <b>Provider Name</b> | : | KALKI Communication Technologies (P) Ltd. |
| <b>Client Name</b>   | : | Fortune 500 Automation OEM                |
| <b>Project Title</b> | : | Level 2 Software for Aluminum Plant       |

### The Problem

The Client OEM, required for their Aluminium Plant Project, a Level 2 System. Kalki supplied the client, with a customized Level 2 Package.

### The Solution

Level 2 Module integrates the plant network with production control functions, enabling superior mill efficiency with roll management, and production and quality reporting.

The Software contains following modules

- *Pass Schedule*
- *Roll Management*
- *Work Roll Change*
- *Roll History*
- *Coil-Reports*
- *Downtime Management*

### Tools Used:

1. OPC Client Toolkit
2. VB/VC Programming Environment
