

## **Kalkitech Press Release**

### **Kalkitech will be at the Techfest Annual User Conference in Niagara Falls, ON**

**Bangalore, 06 June 2016**

**Kalki Communication Technologies Pvt. Ltd. (Kalkitech)**, a leading technology company providing communication and optimization solutions for the Smart Grid, will be participating at the Techfest 2016 Annual User Conference in booth 1, to be held at the **Marriott Gateway on the Falls in Niagara Falls, ON, Canada between 19 and 23 September, 2016.**

Techfest is a week-long event consists of training, conference presentations covering challenges and solutions, an exhibitor showcase, forums for users to present and exchange ideas for technical investments, networking receptions, smart grid planning and enterprise data collaboration. TechFest hosts utilities, system integrators, and consultants from around the world with backgrounds spanning electrical, gas and water utilities, transit, IT, engineering and technology.

Kalkitech said that it was honoured to be invited to speak at Techfest 2016. The organizers extended an invitation for Kalkitech to present a paper on a successful use case where the organization enabled data transmission from a Western European client's wind farm to distribution center. The solution provided by Kalkitech enabled the wind farm to be connected to the distribution center in accordance with DSO's requirements. The paper will be presented by Mr. Curt Goldman.

"Kalkitech has been at the forefront of innovation in the smart grid and smart meters space for some time now. We've found that showcasing our products and solutions always elicits a great response. The opportunity to present our use case at an event on the scale of Techfest helps us share our understanding, expertise and experience with prospects, customers and industry experts. We look forward to making the best of this opportunity, and to many more editions of Techfest", said Prasanth Gopalakrishnan, CEO Kalkitech.

#### **About Techfest**

TechFest is a premier learning, training and networking conference for Survalent's customers. It is a unique opportunity to interact with Survalent's users and technology partners, speak directly with technical experts, and stay up to date with the latest product development and industry trends.

#### **About Kalkitech**

Kalkitech is a smart grid solutions provider that helps energy utilities across the globe achieve energy efficiency. They bring real-time and operational device and sensor data to the control center securely, help monitor & control utility assets and provide advanced analytics. Kalkitech's standards-based technology solutions help in legacy device and communication network migration, Distribution Automation, Wide Area Monitoring, Substation Automation, Advanced Metering and Power Plant Optimization.

Kalkitech has over 200 engineers across its four offices - Bangalore and Cochin in India, Sharjah in UAE, and Campbell, CA, USA. Kalkitech has partners and customers in over 50 countries.

Kalkitech has invested extensively in research and development in several areas including power systems engineering, thermal engineering, control theory and communication and information technology and cloud to build cutting edge and standards based offerings to their customers.
